

## Environmental Policy

### MISSION

ITURRI's mission is to protect people and their environment with innovative, efficient and sustainable solutions to contribute to a safer world. The purpose of this Policy is to establish a reference framework for integrating environmental protection into the ITURRI Group's strategy, decision-making, activities and operations, defining the principles of action for environmental and circular management.

### COMMITMENTS

The ITURRI Group is committed to the Sustainable Development Goals (SDGs) as a working mechanism and integration into the 2030 Agenda to protect the environment and combat climate change worldwide. The Group's environmental strategy is based on several commitments:

Promote a circular and innovative economy in which biodiversity is protected, valued and restored, consumption of new resources is minimised and health risks from environmental problems are reduced.

Analysis and continuous improvement in those environmental aspects that involve a depletion of natural resources.

Achieve climate neutrality in the atmospheric emissions from our activities and, where possible, contribute to a negative carbon balance.

Transparently informing those within our surroundings (customers, suppliers and government institutions) on as much information as may be required regarding the type of management carried out in order to promote the traceability and treatment of waste.

Contribute through our decisions and the focus of our activities to achieving a breakthrough in societal adaptation and resilience to climate change.

Contribute to being a driver of change throughout our Value Chain, partnering with all stakeholders and establishing Strategic Alliances for the development of technologies, training campaigns, awareness raising and new ways of improvement.

Maintain the awareness and sensitisation of the entire team, promoting environmental training and encouraging the participation of each person, inside and outside the business environment, enriching the mechanisms for improvement and effective contribution.

This Policy applies to all Group companies, as well as to non-Group investees over which the Company has effective control, within the legally established limits.

All of us in the ITURRI Group accept these principles, and it is our responsibility to put them into practice. ITURRI promotes environmental improvement and allocates the necessary resources to ensure the successful implementation of this Environmental Policy.
